

PROLINE HOLE SAWS CARBIDE TIPPED

Also for construction

Carbide Tipped Hitachi hole saws are specifically suitable to be applied on construction materials. These include plywood, MDF and chipboard. But also tiles up to hardness factor 6, aerated concrete, and polymer plastics. The carbide tipped hole saws contain sizeable chip rooms providing an optimal chip drain. Specific design in teeth geometry makes for drill-holes to be well finished, enables a high cutting speed, and creates an optimal service life.

HITACHI HOLE SAWS CARBIDE TIPPED	
Material:	HSS alloy
Teeth:	carbide
Shank:	8,5/11 mm Hexagonal
Application:	wood, plastics tiles up to hardness factor 6 aerated concrete
Extras:	Hitachi Quick Power Lock system 11 mm Hexagonal
Accessories:	extension piece
