

Технически характеристики

Боркорона Milwaukee за метал биметална 30х41 мм, Hole Dozer

- O Cutting edge technology for maximum productivity.
- Tooth design A 3.5 teeth per inch tooth design with a positive 10° tooth angle provides the following benefits: Faster and more aggressive cut. Improved heat dispersion during cutting ensures that the teeth stay sharper for longer.

 Deeper curved gullets provide more efficient chip clearance
 - Deeper curved gullets provide more efficient chip clearance preventing clogging and heat build up. - Special shaped tooth angle has less tendency to snag on thinner materials. -Teeth are alternate/side set to minimise binding and friction.
 - Requires less feed pressure This is achieved by the combination of aggressive tooth geometry and good chip clearance resulting in the requirement of less force during drilling.

Продукт: Боркорона Milwaukee за метал биметална 30х41 мм, Hole Dozer

Категория: Боркорони за строителни материали

Марка: Milwaukee

Тип: Боркорона Milwaukee
