

Two stroke oil, HP

OVERVIEW FITS TO FIND A DEALER

2-stroke fuel and oil

Two stroke oil, HP

Husqvarna HP 2-stroke oil is formulated to work well with low-quality fuels. The additives are of the highest quality and are especially chosen to lessen deposits in the crankcase which can arise from using low-quality fuel. The oil is designed to suit the entire 2-stroke product range – from the smallest trimmer used all day up to the biggest chainsaw used for heavy felling and limbing in extremely hot or cold conditions.

• Semisynthetic
