

## Парафин Body течен 1 л, безцветен, Body 900 Cavity W

Специален антикорозионен продукт на база парафин. Предпазва от корозия всички затворени части от купето на автомобила /прагове, врати, кошове, калници/, както и външните долни части на автомобила. Има шумоизолиращ ефект. Съхне бързо и е устойчив на високи температури. Подходящ е за нанасяне след боядисване.

Specially formulated anticorrosive dispersion, containing wax, synthetic resins and anticorrosive compounds

It penetrates into hard to access points, forming a transparent protective membrane

It dries fast without cracking or hardening

It retains its elasticity even at extreme temperatures

It protects from moisture

## Product Application:

⇒ It is applied on the interior and recessed parts of a car body, the inside of the doors, and engine compartment and the headlight interiors. It penetrates into hard to access points, forming a transparent protective membrane. It is ready for use. Applicable with a special gun for wax. Before each use, shake the can well. It is not repaintable. There's no adhesion problem, even if there's moisture on the waxed surfaces. In order to further enhance the penetration properties of the material add some thinner and shake well.

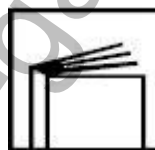

Apply with spray gun:  
4 mm

Always wear protective  
equipment

Apply with brush

Follow the application  
instructions mentioned in
