

fischer Plasterboard fixing GK S with screw

Art.-No. 84343

Product Description

The fischer gypsum plasterboard fixing GK S is made of high-quality nylon. When in pre-positioned installation, the plug is screwed in using the setting tool included with a cordless screwdriver so that it is flush to the surface in gypsum plasterboard. No preliminary drilling is necessary for board thicknesses up to 15 mm. fischer GK S is fully supplied with a chipboard screw. It is therefore suitable for quickly and safely mounting pictures, lights, and electrical installations.

Advantages

- The included setting tool combines the drilling and fixing setting functions. It thus allows for a fast and simple installation.
- The sharp, self-tapping thread of the GK enables a secure, positive fit fixing. This achieves a high load-bearing capacity.

- The short fixing length means that only a small amount of space is required behind the board. As a result, the GK can also be used in the case of unknown board thickness and cavity depth.
- The cross-drive recess in the head of the fixing means that the GK can also be screwed out like a screw without a setting tool.
- The GK can be used with the most wide-ranging screws, hooks and eye screws. This allows for a broad range of applications.

Technical Data

Anchor length	22	[mm]
Drive	PZ2	
Contents	5 x GK, 5 x chipboard screw 4.5 x 35, 1 x setting tool	
Packaging	Blister card	
Amount	5	[St.]
GTIN (EAN-Code)	8590369843438
