

## VIVALUX®

## LUX GU10

В допълнение към спотове с фасунга за GU10 в серията LUX се предлагат и полилеи за външен монтаж на таван или на двупроводна монофазна релса. Полилеите са изисквано решение за осветление в съвременния интериор.

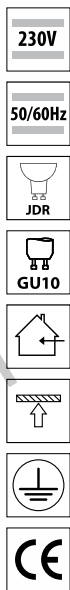

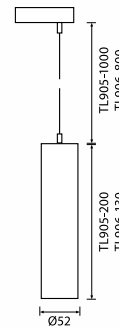

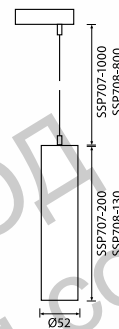

In addition to the spots with GU10 in LUX series there are suspensions with surface ceiling mounting and for 2-wire single-phase rails for track lighting. These suspensions are a sophisticated lighting solution in the contemporary interior.
