

Стартерно устройство Деца с вграден акумулатор 350 А, 2.1 А, 12 V, Fast 7K

FAST 7K

Boosting voltage 12V
Battery capacity 6000mAh

Description

Code: 380600

Jump starter and Power Bank with lithium battery (LiPo technology = lithium polymer battery).

- Quick start of motorcycles, cars and vans with 12V battery.
- SMART BOOSTER CABLE** (models 10K e 15K)
- It protects against reverse polarity and short circuit and it prevents jump start operation if the FAST battery is discharged (voltage below 11V), preserving the device itself.
- Powering smartphones, laptops, tablets and other commonly used portable devices.
- High J-BME3s**: it is the energy supplied by the jump starter within three seconds of cranking to keep the engine run.
- Reduced weight and size**, the lithium battery stores four times the energy of a lead battery with the same weight.
- Quick charge**
- High brightness LED lamp**, with selectable fixed lighting, flashing alarm and SOS signal.

Features

Input voltage: 1 Ph - 100/240V 50/60 Hz

Boosting voltage (Volt): 12

Boosting current max (Amp): 1000

Boosting current (1V/C) (Amp): 350

Battery capacity: 6000mAh

Battery types: Automotive: Pb (WET-AGM-GEL) - Lithium (LiFePO4)

J-BME 3s (joule-Battery Maximum Energy): 4000J

For engines up to - Ta=25°C - (Petrol): 2500cc

For engines up to - Ta=25°C - (Diesel): _

USB output: 5V - 2,1A

DC output: _

Input (Jack): _

Input (Micro-USB): 5V - 1A

Charging time: 6h

Weight Kg ≈: 0.2

Dimension, Wid.-Dep.-Height (mm): 135 x 76 x 16
