

Стартерно устройство Деца с вграден акумулатор 500 А, 2.1-3.5 А, 12 V, Fast 15K

Code: 380800

Jump starter and Power Bank with lithium battery (LiPo technology = lithium polymer battery) Quick start of motorcycles, cars and vans with 12V battery.

SMART BOOSTER CABLE

It protects against reverse polarity and short circuit and it prevents jump start operation if the FAST battery is discharged (voltage below 11V), preserving the device itself.

Powering smartphones, laptops, tablets and other commonly used portable devices.

High J-BME3s: it is the energy supplied by the jump starter within three seconds of cranking to keep the engine run. **Reduced weight and size,** the lithium battery stores four times the energy of a lead battery with the same weight. **Quick charge**

High brightness LED lamp, with selectable fixed lighting, flashing alarm and SOS signal.
