

Захранващо устройство HiKOKI - Hitachi за акумулаторни инструменти 36 V, ET36A

The HiKOKI ET36A power adapter is compatible with 36V multi-volt tools. It turns cordless tools into wired tools for steady-state and continuous use. You will never need to worry about running out of battery life again!

Features:

- Pivoting cord position from 90 to 180 degrees ensures a more comfortable operation for the tool in use
- The lamp indicator provides clear status indication
- The protection function cuts off output in case of overheat or overload
- Simply plug the adaptor into the wall or generator and then slide the "battery" on to your machine to get full corded power
- A 2m cable from the power box to the wall and a 5m cable from the power box to your tool means that you still retain a good amount of manoeuvrability

Specification:

- Power Input: 1,010W (240V:1,050W)
- Operating Temperature Range: -10°C to 40°C
