

**NESPOLI
GROUP**

- Thanks to the "rough", "micro-craters" structure, MicroCrater[®] rollers ideally absorb and are applying solvent-based paints / lacquers on the painted surface.
- Provide faster and more accurate paint surface. It doesn't leave the microfibers on the surface.
- A comfortable two-component handle of polypropylene and rubber allows for a perfect fit for every hand, it is much more resistant to impact and any solvents, is stable and adhesive which allows for precise movements.
- Easy cleaning and time saving..
- Available in 1 kind and 2 sizes 5 cm i 11 cm:
 - for solvent-based, laquer and alkid paints.
