

SPEED-N manual cutters

The most versatile cutter in its class.

Description

The SPEED-N range of manual cutters allow the frequent cutting of tiles and glazed stoneware and the occasional cutting of porcelain tiles.

In the SPEED-N range, the tile fixer will find it a most versatile manual cutter in its class.

The SPEED-N range of manual cutters are double guide cutters which offer better visibility during scoring and cutting. They have a mobile breaker that facilitates performing angular cuts.

With the lateral stop for repetitive cuts with a millimetre calibration and its 45° set square it becomes a complete and functional cutter for comfortable and high-quality work. Furthermore, the SPEED-N has additions for the base in order to increase the area of support and for holding large pieces.

These manual cutters are fitted with guides made of solid, chromed and rectified 18 mm diameter steel and have an anti-corrosion treatment in order to facilitate scoring and have a greater durability.

One feature of this range of manual cutters is the possibility of exchanging scoring

wheels in order to best fit different types of tile and to prolong the life of the scoring wheels. It comes with an 8 mm scoring wheel, although other compatible scoring wheels are the 6 and 10 mm versions.

The SPEED-N range has three different cutting measurements 62, 72 and 92 cm, in both versions with and without a case and they are perfect for cutting ceramic tiles (BIII) and stoneware both for straight and diagonal cuts offering a greater cutting precision.

In this tool, as in most of the RUBI catalogue, we have had the collaboration of industry professionals and end-users in the design and creation process; this joint work allows us to release products with guarantees that meet the needs of our most demanding customers.

RUBI has always been a leading manufacturer of manual cutters for ceramics, which is why it offers every user a choice that perfectly fits its needs. The SPEED-N range of manual cutters is another example of this commitment to professional ceramic tilers, who have a range of tailor-made cutters.

Product highlights

- Aluminium base for greater robustness.
- Light and easy to transport
- Reinforced construction elements. High breaking power.
- Chromed and rectified steel guides with anti-corrosion treatment. Greater durability.

Materials

- For the frequent cutting of glazed stoneware and tiles and occasionally for porcelain tiles.

Features

- Direct view of the scoring and cutting line.
- For 72/92 models:
- Interchangeable scoring wheels from Ø1/4" (6mm) to Ø13/32"(10mm).
- Base supplement made of aluminium.
- Ø5/16"(8mm) scoring wheel included.
- With lateral stop for repetitive cuts and 45 degree squares.
