

Electric Cutter ND-180

Portable cutter, ideal for finishings and renovations.

Description

The ND-180 electric cutter and mitre saw falls into the portable cutter category.

Its small size (39.5 x 38.5 x 24.5 cm) and light weight (11.8 kg) make it an ideal electric cutter and mitre saw for carrying out finishes and renovations. Allowing the professional tile fixer to make the necessary cuts at all times, in the same workplace, reducing displacement, corrections and downtime.

Its low water consumption and the possibility of fitting a work tray (accessory not included) make it one of the cleanest mitre saws on the market.

With the ND-180 cutter we can make cuts in ceramic tiles, especially and intensively in ceramic and stoneware tiles.

Its 0.7 hp single-phase motor includes a thermal protector that protects it from moments of excessive force.

The ND-180 is equipped with a 180 mm diameter, CEV type blade for general ceramic tile cutting.

The metal table is adjustable, and can be set to up to 45° to make mitre cuts.

The ND-180 cutter and mitre saw also includes a lateral stop for repetitive cuts and a template for 45° angle cuts.

Those users who prefer better portability and greater protection of this cutter have a version with a transport case that includes a second additional diamond blade. The case can in turn be used as a support table for the ND-180 cutter.

In addition, as part of the strategy, RUBI is continuously researching according to the evolution of materials and based on the requirements received by leading ceramic tile manufacturers worldwide, 30,000 RUBI dealers and more than 40,000 end users registered in Club RUBI. Thanks to all this, the RUBI cleaning, protection and maintenance range is unique in the market, offering a comprehensive solution to the user in having products for all phases of treatment, in addition to the tools necessary for successful implementation.

Product highlights

- Water cooling of the blade.
- With foldable table for mitre cutting.
- Lateral stop to allow repetitive cuts.
- Guide for 45° cuts.

Materials

- For cutting ceramic tiles, ideal for Floor and Wall tiles.

Features

- Single-phase motor.
- For Wall tiles, Floor tiles and other materials.
- Diamond blade Ø 180mm included.
