

SLIM CUTTER G3

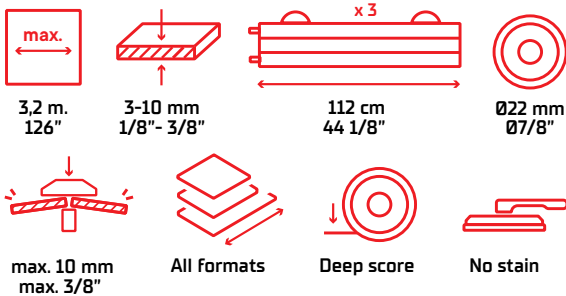

MINIMUM EFFORT FOR AN IMPECCABLE CUT

Strength, handling, reliability. Introducing the SLAB CUTTER G3, the best cutter in its class for large format.

- 1 No other cutter on the market works as well for cutting thick tiles. Its powerful scratching carriage has a lever system, like you find on fixed cutters. This allows us a superior scoring power with minimal effort, and therefore a better finish, without breakage or damage to the tile.
- 2 In addition, its powerful mobile suction cups, integrated in the guide, give us a greater fixation without leaving stains.
- 3 Redefine the meaning of 'compact' with a tool suitable for any thickness and format. With a cutter, in short, unique of its kind.
