PRO FINE Joint Smoothers

For even silicone and acrylic joints in confined working spaces

- joint smoother for smoothing silicone and acrylic joints – ideal for working in confined working spaces
- two smoothers with a round profile (radius 5/10 mm) and 45° edge profile (widths 6/10/12 mm) for creating the desired joint look
- easy-care flexible plastic for effortless and complete removal of silicone and acrylic residues
- handle made of robust fibreglass-reinforced plastic (FRP)
- finger grooves assist with achieving the optimal grip position
