

## Seaming tool PS55

# For clamping and positioning components with a smooth surface

Simply better.

### Your benefits at a glance:

- 1 Gentle suction cups**  
Easy to use. Engage the handle on the suction cups to generate a vacuum, and the seaming tool adheres automatically to the sheet.
- 2 Practical cam levers**  
The two levers on the guide bars can be used to easily control the height differences which can occur when pulling together the sheets.
- 3 Sturdy construction**  
Cold-drawn, electro-galvanised guide rods in sturdy aluminium profiles prevent the seaming tool from bending open during the clamping process and hold the seaming tool on one level. This guarantees a precise finished result.
- 4 Ergonomic plastic handle**  
With the perfect handle, you can achieve up to 260 N of clamping force in the horizontal plane. This need is met by the high-quality two-component plastic handle with easy-to-move trapezoidal thread spindle.

Seaming tool PS 55

Order-No.	Opening	Width	Length	Weight	
	mm	mm	mm	kg	V3
PS55	10-55	144	363	1.68	

- For clamping and positioning components with a smooth surface, such as ceramic, granite, Corian®, plastic, sheet metal and glass, which require low clamping forces (up to 260 N)
- Clamping levers on the suction cups ensure rapid handling
- Cam lever to compensate for differing heights at the joint

Corian® is a registered trademark of DuPont
