

Standard delivery without machine and mixing bucket

RMX in transport position with carrying handle

RMX with Xo 55 duo raised to the maximum height

Advantages for you

- **Mixing without physical strain**
The new RMX takes the equipment load off your hands during mixing. A particular advantage is the gas-pressurized spring, which enables the swivel arm to be raised and lowered with ease.
- **Attractively priced alternative**
The mixer stand costs far less than an automatic mixing machine. However, the hand-held mixer has to be guided by hand during mixing because automatic mixing is not possible.
- **Rugged design**
For tough daily use on the building site, securely supported on 4 strong legs.
- **Easy handling**
Mit wenigen Handgriffen auf- und abbaubar.
- **Easy to transport**
Light in weight and complete with carrying handle.
