GEDORE

"Powerful ratchets and sturdy sockets" powerful reliable durable

A huge variety of types

- Intelligently designed **ratchets** meet every demand placed and more besides.
- Sturdy, fine-toothed, durable and extremely resilient
- Top-grade industrial quality for the hardest of continuous uses
- Unrivalled diversity of hot-forged **sockets**, metric, inch, TORX®, multi-tooth, internal hexagon or slot and cruciform
- Screw head protecting profiles (UD bi-hexagonal and hexagonal)

Quality from A - Z...

- Use of the best-possible raw materials, most up-to-date machinery and environmentally-friendly production processes
- Our tool specialists vouch for exactness in processing and continuous refinements
- Unique manufacturing processes and special tool treatment bring about the best in results
- Stringent quality checks after each production step ensure a constantly high level

Maximum quality socket sets...

- Innovative, functional design
- Are blue-hammer finished and from GEDORE
- Maximum resilience of the sockets and robustness of the drive parts have turned "GEDORE sockets sets" into a household name internationally
- A name known on the tool market for many years now
- The sturdy and secure way to keep and carry your tools

From precision mechanics to heavy industry...

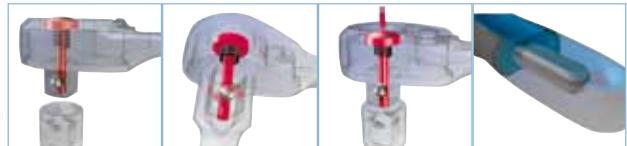

- GEDORE operating tools and accessories for professional tool use in each and every industry
- For heavy continuous use and safety in everyday work
- Available individually or in practical set compilations, in the module or in sets
- Customised manufacturing on request

U-20 Ratchets

Design-oriented premium ratchets

- + The release head simplifies attachment and removal of sockets. A ball locking device ensures a tight connection when the ratchet is in use.
- + Slim, ergonomic design
- + 2-component handle, comprising a hard plastic core with rubber sheathing for heavy industrial use. Hanging hole for easy-to-find storage.
- + Easy change lever for clockwise and anti-clockwise movement.
- + The shaft is made from high-grade chrome-vanadium steel, making it ideal for heavy and constant use.

Ratchets

The properties of our hot-forged spanners also apply to our hot-forged ratchets.

A special feature of GEDORE ratchets is their mechanism, in which the pawl does not fully engage in the ratchet until full loading is reached. This process is invisible to the naked eye. The movement of the mechanism is in the infinitesimal range, amounting to just a few hundredths of a millimetre. The perfect centred running of the ratchet under load achieved by this design is a significant quality and

safety feature of our ratchets. There is no unnecessary stressing of the individual elements when the ratchet is turning with no load, and no possibility of the mechanism tilting under load. This ensures fault-free under-load operation for the life of the ratchet. The design also has a positive effect on working safety. Tooth jumping, that would lead to jerky movement, is completely eliminated, minimizing the risk of accidents. This applies equally to GEDORE lever-activated ratchets U-20 and all other GEDORE ratchets.

Manufacturing process for sockets

Like all hot-forged tools, GEDORE sockets (*) are characterised by their homogeneous structure. The fibres run in parallel with the contour of the tool. The uninterrupted fibre orientation prevents residual stresses in the structure. In cold-forged tools, the fibres or lines of stress may deviate. Fibre orientation is equally important in nature. For example, in a tree, the soft fibre orientation is parallel to the branch, so the wood is resistant to bending and twisting. If fibres become kinked, the branch loses its stability at the kink point and breaks. The low-stress GEDORE sockets withstand suddenly occurring peak forces better than cold formed sockets.

Pro GEDORE

- Use of high alloy 31CrV3 steel
- Heat formed sockets which have a wear resistant, fine-grained structure and have a long service life
- Narrow production tolerances ensure an ideal load transmission and low wear and guarantee a long service life
- Distinctive ball catch ensure secure fit on the square drive
- Good grip due to deep knurling even when held with oily hands or when working with protective gloves
- Good look due to chrome plating and varnishing
- Broad range in all sizes, drive and drive-side and for a wide range of screw types. One of the most diverse ranges in the market.

SLIDING T BAR WITH RELEASE 1/4"

- Secured against unintentional removal
- GEDORE vanadium steel 31CrV3, polished, chrome-plated
- Turn handle for easy locking and releasing
- Accidental release when working is prevented because of the asymmetrical release point
- Particularly useful for work in sensitive areas where certainty against loss is a theme
- Examples: Aircraft engine, work in deep machine bodies
- DBGM (German utility patent)

SK RATCHET AND SOCKETS

SK = SOCKET SHORT

- Especially for working in confined spaces
- Sockets and ratchet with tubular section for taking up long thread bolts
- A compact and inner-cavity hexagonal system as the connection between ratchet and socket
- The sockets are inserted into the ratchet hexagon female drive
- The drive length is concealed inside the ratchet and shortens the projecting part of the socket by 50 % as against the traditional system
- Sockets and ratchet hot-drop forged of GEDORE steel
- Sockets from 10 to 24 mm

- Secured against unintentional removal
- GEDORE vanadium steel 31CrV3, polished, chrome-plated
- Turn handle for easy locking and releasing
- Accidental release when working is prevented because of the asymmetrical release point
- Particularly useful for work in sensitive areas where certainty against loss is a theme
- Examples: Aircraft engine, work in deep machine bodies
- DBGM (German utility patent)

UNIVERSAL EXTENSION WITH MAGNETIC EFFECT

The essentially plain-looking universal extension in combination, for instance, with the right sockets and socket drivers is transformed into our secret star.

Your advantage:

- Secure fixing even of large screws
- One-handed operation Using the socket, the screw can be immediately screwed in
- Powerful magnet with spring mechanism ensures centric screw guidance.
- Makes work easier particularly in confined spaces

1990 M

EXTENSION 1/2" with magnet

- For hand-operated sockets with square drive as per DIN 3120, ISO 1174, with ball locking device
- The holding magnet securely fixes the screws in the socket
- One-hand operation - using the socket the screw can be immediately screwed in
- Thanks to a spring mechanism the holding magnet is always in direct contact with the screw head. It ensures that the screw is centrally guided
- A strong permanent magnet keeps hold of even large screws
- Makes work easier particularly in confined spaces
- Hot forged
- GEDORE vanadium steel 31CrV3, polished, spring pin manganese-phosphated

TOOL HOLDING RAIL, MAGNETIC 1/2" empty

- External squares to take 12 or 16 standard commercial 12.5 mm (1/2") sockets
- Two female square adaptors to take ratchets, sliding T bars, extensions etc.
- A strong magnet securely holds the socket rail to ferrous metals
- Additional holes are provided for wall mounting the socket rail or attaching to non-ferrous materials
- The sockets are securely locked by the ball at the square-drive end by turning them 90°
- It is a simple matter to "unlock" and remove the sockets, by turning them 90° in the opposing direction
- Delivery without tools
