

Kraftform Turbo

The screwdriving time machine

The Krafftform Turbo accelerates the screwdriving – in a purely mechanical way.

Faster screwdriving

The construction of the Krafftform Turbo allows a quadruplication of the speed when manually screwdriving - purely mechanical, without electricity!

With and without Turbo

If required, the turbo function can be activated by simply pressing a button. Turning it off is recommended for loosening or for fine adjustment and final tightening of the screw with a high torque.

Robust, maintenance-free gear made of steel

The robust steel design is maintenance-free and ensures a long product life.

Handle/interchangeable blade system

Thanks to the Rapidaptor bit holder, the Krafftform Turbo can be used with all conventional 1/4" bits.

Many users would like to be able to carry out screwdriving processes faster without compromise. With a screwdriver that is precise, allows powerful screwdriving, and is much faster than a conventional screwdriver.

A part time universal gear is the solution: integrated in the handle of the screwdriver, it significantly increases the working speed.

The Krafftform Turbo accelerates the screwdriving in a purely mechanical way.

827 T i Kraftform Turbo hand holder

Application: For Wera VDE interchangeable blades only

Design: Connectable mechanic turbo function for quadrupling the screwdriving speed; robust, maintenance-free gear made of steel

Handle: Kraftform with anti-roll protection, multi-component
