Pliers Wrench – 180 mm length New and improved: the pliers wrench with better performance at a lighter weight

- ▶ Increased gripping capacity due to two additional setting positions: flexible gripping of all widths across flats up to 40 mm
- ▶ 10 % less weight with the same stability
- ▶ Practical adjustment scale: a laser-cut scale allows the wrench opening to be preset before gripping
- > Replaces a whole set of spanners – metric and imperial
- > Even easier to use due to considerably reduced weight, fluted pliers handle and slim jaw profile with undercut
- > Work directly on chrome: zero backlash jaw pressure prevents damage to edges of sensitive components
- > Reliable catching of the hinge bolt: no unintentional shifting
- > Lever transmission greater than 10:1 for strong gripping power
- > Chrome vanadium electric steel, forged, oil-hardened

86 01 180

86 02 180

86 03 180

86 05 180

Gripping capacity extended to 40 mm

Opening width lasered onto the pliers head (metric on the front and imperial on the back)

Work without damaging sensitive surfaces
