- L-keys for hexagonal socket screws
- Hex-Plus allows socket head screws to live longer
- Hexagonal ballpoint on the long arm
- BlackLaser for high corrosion protection and long service life
- Imperial

High quality L-keys for imperial hexagonal socket screws. The ball-end on the long arm allows for reliable working even in difficult installation situations. The BlackLaser surface treatment provides outstanding surface protection, even against corrosion, and a long service life. The tools are quickly to hand thanks to the laser-engraved and thereby wear-resistant size markings on the L-keys.

L-Keys

Hex-Plus

Ball tip

Size identification

We questioned the classic L-key design, since all too often the screw head recess is rounded out, meaning screws can no longer be tightened or loosened and so the user finds the L-key slipping out of the recess. Wera Hex-Plus tools have a larger contact surface in the screw head. The notching effects reduced and thereby the deformation of the screws. At the same time, as much as 20 % more torque can be applied.

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex- Plus tools fit into every standard hexagon socket screw!

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

The size of each L-keys has been engraved by a laser. In addition Take it easy L-keys have a colour coding according to sizes - for simple and rapid accessing of the required tool. Making it easy to find the right tool.

Surface protection

Chrome-plated hexagon L-keys for outstanding surface protection and long service life. High corrosion protection.
