Injection polyurethane wheels, polyamide 6 centre, swivel top plate bracket type NLX with front lock

Wheel description
Injection polyurethane tread; hardness 60 Shore D. Polyammide 6 centre.
Plain bearing bore or stainless steel roller bearing bore
The plain bearing bore results from a hole in the material forming the centre of the wheel and contains the axle.
In the roller bearing bore, the bearing housing is obtained by moulding and contains stainless steel cylindrical roller bearings with polyam
Stainless steel axle
Axle composed of ground AISI 304 stainless steel bush, with stainless steel bolt according to UNI EN 24017 and stainless steel nut according to UNI EN 24032.

Swivel top plate bracket type NLX. The plate, the ball rice ring and the fork are made of AISI 304 stainless steel; swivel actions: double ball greased race of AISI 304 stainless steel with dust protection seal made of polyethilene. The king pin is integral with top plate and duly rivetted. The front brake is necessary to lock wheel and top plate rotation.
