Features

Top product quality

GARDENA German-made quality products stand for trusted performance, reliability and continual innovation.

Powerful cut

The length-adjustable lever arms permit excellent lever action which means less force is required when cutting. In addition, higher branches can be reached easily.

Accurate and easy to operate – Non Stick extra

This precision-ground blade with non-stick coating and excellent cutting geometry ensures accurate cutting with low operating force.

Convenient and safe – the ErgoTec

Aluminium lever arms and ergonomically-shaped handles with soft components provide the required non-slip characteristics and guarantee easy handling and safe work.

Gentle on the wrists

Stop buffers made from special plastic protect the wrists.

The 25-year warranty ensures high quality

* For detailed warranty conditions, please refer to the enclosed operating manual or online at www.gardena.com/warranty. This warranty does not affect your legal warranty claims.

Description

The telescopic Pruning Lopper for fresh wood

The GARDENA Pruning Lopper TeleCut 650-900 B is a bypass Pruning Lopper for cutting fresh wood. Due to its low weight and the excellent lever action, the amount of effort required to cut is low. Length-adjustable lever arms also permit accurate cutting of higher branches. In addition, stop buffers made from special plastic protect your joints. Precision-ground blades with non-stick coating guarantee an accurate cut which is gentle on plants. 25-year warranty.
