**Family:** Regulating hinge

**Material:** 11SMn30 steel

**Description:** Mechanized component which is installed on a metallic swing door to allow its opening and closing. It is specially designed to allow the height adjustment of the doors in which is installed. Its drop profile shape facilitates the welding. The regulating system consists of two screws: the inner one which rests on the lower base of the axle and allows its regulation from 0 to 12 mm; the outer one which rests on the inner screw working as a locknut to avoid its loosening.
