Take it easy tool finder: colour coding according to profile and size

High quality Wera Micro screwdriver for precision mechanical work. Ballpoint profile: the ballpoint drive profile means that it is possible to swivel the tool axis away from the screwdriving axis, thus enabling "round the corner" screwdriving. Rapid twisting is possible by fixing the hand on the twist cap and using the fast-turning zone just below it. This makes time-consuming grip adjustments

unnecessary. Power zone with integrated soft zones ensure the transfer of higher tightening and loosening torque. Precision zone for the right angle for adjustment work. The Wera Black Point tip offers high corrosion protection and an exact fit. "Take it easy" tool finder with colour coding according to profiles and size stamp – for simple and rapid accessing of the required tool.
