Hot air tool HL 1620 S

A must for your home. Practical helper for occasional DIYers.

With the HL 1620 S hot air tool everyday challenges quickly disappear into "hot" air. Drying plasterwork has never been easier, stripping paint turns into sheer pleasure and waxing skis and snowboards is child's play. The HL 1620 S hot air tool is always a huge help, for example, when it comes to thawing frozen water pipes, shrinking on cable sleeves, drying wet paint and many other jobs. Weighing a mere 670 g and with optimised centre of gravity, the tool fits comfortably into the hand and permits fatigue-free working. Finished to a high standard of quality, the HL 1620 S hot air tool is built to last a good 20% longer than the predecessor model. Depending on needs, there are two temperature settings to choose from: 300 ° and 500 °C.

Benefits: with optimised centre of gravity for fatigue-free working with one hand. For all standard nozzles (apart from reduction nozzles). With integrated thermal cut-out to prevent overheating. Impressive 1600 watts of power, airflow rate adjustable to two settings (240/450 l/min).

Technical specifications Hot air tool HL

1620 S Thermal cut-out	Yes
Thermostat	No
Max. airflow rate	450 l/min
Model	Folding box
Heating element	Micanite
Temperature setting	2-stage
Power connection	220 - 230 V, 50/60 Hz
Motor	Brush motor
Dimensions (l x w x h)	252 x 85.5 x 200 mm

Min. airflow rate	240 l/min
Power cord length	2.20 m
(electronically controlled)	No
Airflow regulation	2 stages
Protection class (without earth terminal) II Power consumption	1600 W
Min. frequency	50 Hz
Max. frequency	60 Hz
Min. temperature range	300 °C
Max. temperature range	500 °C
Temperature regulation	Yes
Air volume	450 l/min
Weight	0.67 kg
