F 525 Diagrip™

F 525 Diagrip™ is professional diamond blade series for cured concrete cutting, developed for electric floor saws up to 18 kW.

Being in the Gold category, the blades are developed for intensive professional use in specialist applications, providing maximum cutting speed and wear resistance in heavy cutting operations.

Diagrip™ is a revolutionary technique for manufacturing segments. It ensures that the diamonds are distributed evenly through the material, so they are exposed and expended at an even rate, for maximum efficiency. It also makes them stay in place longer. The tool edges remain very even and powerful, even when cutting hard reinforced concrete. One of the greatest benefits of Diagrip™ is how quickly and smoothly the diamond tools cut.
