

PROLINE HAMMER DRILL BITS

SDS-MAX 4-CUTTER Ø 16 – 52 MM

Hitachi's SDS-Max 4-cutter is a robust, professional drill bit designed for excellent performance with uncompromising quality in its detail. In this series of drills the 4-cutter carbide head is formed by a main plate with two hard metal side plates at an angle of 90°.

This special design prevents seizing up on hitting rebar, where the large secondary cutters actively support the main carbide tip during drilling. An additional feature added to the carbide tip construction is the wear marking, that functions as an indicator for evaluating the dimensional stability of anchor holes.

Due to the drills' optimized core reinforced flute, high break resistance is ensured. Moreover the impact energy is transferred directly to the drill head, and at the same time the dust is being removed rapidly for constant progress.

All in all, this drill bit achieves the optimum between speed, durability and professional performance.
