

# Handspreader M

<b>Working area capacity (<math>\pm 20</math>):</b>	<b>100 m<sup>2</sup></b>
<b>Spreading width:</b>	<b>4 m</b>
<b>Container capacity:</b>	<b>1.8 l</b>

## Features

## Year-round performance

The Handspreader can be used with spreading material in a variety of particle sizes – with fertilisers, seeds, granulate, sand and road salt. This enables its application all year-round, both in summer and in winter.

## Convenient handling

The Handspreader is easily operated using a hand crank. The rotation speed regulates the spreading range.

### **Even distribution**

No tipping, no clogging. The free-running spreading disk provides optimal functionality and even distribution of the spreading material. The spreading range is 1 to 4 metres ( $r= 0.5 - 2$  m).

### **Description**

#### **For even distribution of spreading material on smaller areas**

The GARDENA Handspreader M is optimally suited for distributing fertiliser and road salt on smaller areas. The quantity setting for the spreading material is adjusted directly on the ergonomically designed handle. The Handspreader is operated using a hand crank. A free-running spreading disk provides optimal functionality and even distribution of the spreading material without tipping or clogging. The container is made of high-quality plastic and is consequently extremely sturdy.

#### **Technical Specifications**

<b>Article No.</b>	431-20
<b>EAN-Code:</b>	4078500033121

#### **Productivity**

**Working area capacity** 100 m<sup>2</sup> ±20%
