

Hose clamp SGS

Usage

For fastening:

- Hoses to connections

Description

- Hose clamps for large clamping ranges with crimped band edges and rounded housing base.
- Versions W 1 zinc plated and W 2 stainless steel.
- W 1 quality obtainable in 9 mm and 12 mm width.

Advantages / Benefits

- Flexible band for optimal seat and sealing even with out-of-round connections and hoses.
- Short housing base for optimal adaptation and high uniformly distributed radial forces.

Installation

Installation tip

- The optimal tightening torque depends on hose diameter and hose material.
- The tightening torques are to be observed in accordance with the specified values.
- **Caution!** If the tightening torque is above the optimal value, the seal is endangered.
