

Pattern bits

7/8/9/12B

Pair up these double fluted bits with your choice of template to produce cabinet and furniture pieces, signs, toys and any other creative projects.

Carbide tipped to last longer, CMT pattern bits are equipped with top bearing for working with the bearing above the wood piece.

This gives you a clear view of what you are routing so you can work confidently and accurately.

Safety tips: Make sure your router is in top condition. The template must be securely fastened to the workpiece.

When choosing a bit, carefully consider the thickness of the template and all the implications of the cut. Opt for the shortest bit possible for the project you are working on.
